Divine Message from Pujya Swamiji

Ganga Dussehra Blessings

The 18th of June marked Ganga Dussehra, the day we lovingly refer to as “Gangaji’s Birthday.” It is the day on which we commemorate the time when, answering the tapasya and incessant prayers of King Bhagirath, Ganga flowed down from the heavens to the Earth.

Ganga did not flow down merely because She wanted to, but rather with a very specific purpose - to serve

humanity. In the story of Her descent, She descended from heaven itself to flow onto the Earth to liberate the 60,000 sons of King Sagar, who had been turned to ash yet had not received final rites. Thus, Ganga’s waters flowed down and washed over the ashes, freeing their souls. Likewise, today Ganga is seen as a liberator, and anyone who takes a dip in Her waters is freed from all past karma.

Divine Message from Puja Swamiji

But Ganga doesn't provide just liberation, but also life itself, as She provides water for the hundreds of millions who live along Her banks. Over 500 million people live within the Ganga River Basin and directly depend on Her nourishing waters, as well as millions of animals and plant species. Her waters irrigate thousands of farms which feed more than one-third of India's population.

Ganga also teaches us so many lessons on how to truly live divine lives. First, Her waters flow for all. Whether one believes in Her sanctity and sings Her aarti daily or throws trash in Her, whether it is a Hindu's farm or a Muslim's farm or a Christian's farm, Ganga's waters provide for all. She quenches everyone's thirst, and irrigates everyone's farms. She never hesitates and never discriminates, but gives and gives and gives.

Yet, on this last Ganga Dussehra, Ganga also sent us a message. Tragic flooding and subsequent landslides swept away homes, businesses, whole villages, bridges and roads. Thousands of people lost their lives, and tens of thousands were trapped for days in the mountains without shelter, food or water.

Yet, we have to wonder why all this happened, and what message Mother Ganga and Mother Nature was sending us.

As the Himalayas get deforested, as the mountains are blasted with dynamite to make room for wider roads, we reap the consequences of fragile mountains and top soil that is no longer rooted to the ground. Hence, when the rains come, with no trees or rooted soil to hold the water, the mountain sides run into roads and villages, and our precious top soil runs into the rivers.

And what is this all being done for? Development. Precious resources are being blasted out of the mountains and the riverbeds, trees are being cut down all in the name of "development." And what is this development? Block-long shopping malls, product after product, plastic, building after building, all created in an effort to quench our desire for happiness. Yet, is this what true development is? Is this what will bring us happiness? Is the destruction of our Earth the price for happiness? Surely it is not.

Development is necessary. People need electricity, clean water, proper sanitation, jobs, and technology, and there is nothing wrong with these things. But the question becomes, at what cost? If our over-consumption and ceaseless desire for more and more leads to the destruction of our own Mother Earth, this is a tragic problem. If we continue to build in ways that damage the environment instead of building in eco-friendly, sustainable

Divine Message from Pujya Swamiji

ways, this is a problem. Not only are we hurting our Earth, we are hurting our fellow man. In the upper reaches of the Ganga, where people have lost everything, the people who are hurt the most are simple villagers and pious pilgrims. Whole villages have washed away, homes have been lost, yet surely these are not the people guilty of over-consumption or rampant unchecked development.

On Ganga's birthday, She gave us an ultimatum: "Care for me, care for my mountains, my trees and my tributaries and I will bring you life and liberation. Deforest my mountainsides, pollute the air such that the warmth melts the glaciers, dam and divert me, and you will reap the consequences."

It is such an important message Mother Ganga gave us: Nature is not ours to objectify, use and abuse. Mother Nature brings life when we treat Her with respect, care and love. But nature neglected and abused wreaks Her own havoc upon Her abusers.

The choices we make in our lifestyle have direct consequences for the planet we live in and that our children will inherit. What we eat, what we buy, where we go and how we get there all

play formidable roles in whether we will bequeath to our children a planet that is green, lush, healthy and able to sustain life, or one that is desecrated, polluted, poisoned and poisonous to its remaining inhabitants.

By Her grace, like a true Mother, Mother Ganga is giving us another chance. As Her waters have receded and rehabilitation efforts have begun, let us take Her message to heart and change our ways so that Mother Nature, Mother Ganga and all our brothers and sisters upon Her banks and around the world may live safe, healthy and nurtured lives.

GANGA RIGHTS CAMPAIGN

To add your name to the petition, please visit www.gangaaction.org.

The National Ganga Rights Movement, which is being spearheaded by Ganga Action Parivar, is advocating for a National Ganga Rights Act to protect and restore one of the world's most precious and beloved river systems.

Mother Ganga is polluted by nearly 3 billion litres of sewage and chemical waste every day. Her rights are being violated, and in turn, our rights to clean water are being violated. People are getting sick. Children are dying. It's time we say no more. Ganga has the right to flow in Her clean, pristine form. Ganga's Rights are Our Rights.

Present environmental laws, which regulate the amount of allowable harm that may occur to ecosystems, have not proven adequate to protect India's National River, which also sustains the lives of some 500 million Indians. The Water (Prevention and Control of Pollution) Act of 1974, for example, calls for substantial jail time and fines for repeated polluters, yet pollution levels within the Ganga have grown progressively worse.

The proposed National Ganga Rights Act takes its precedence from other nations. Rights have been bestowed upon nature within the Constitution of Ecuador, have been granted to the Whanganui River in New Zealand, have been recognised for Mother Earth in Bolivia, and have been mandated within municipalities including Pittsburgh, USA.

The Act is necessary because laws decreeing the rights of nature also grant legal authority to residents and governments to enforce and defend those rights. These laws change the status of ecosystems from being regarded as property to being treated as rights-bearing entities.

Says Pujya Swamiji, Founder of Ganga Action Parivar, "If Ganga dies, India dies. If Ganga thrives, India thrives. In violating Her, we are violating basic human rights, and we are putting at risk the bright futures our children so greatly deserve. Now is the time for action. Let us all stand up and say, it's time for the National Ganga Rights Act."

The National Ganga Rights Act is proposed with the purposes of establishing, securing, and defending the inalienable and inherent rights of the Ganga River, its tributaries, and watershed, and the rights of the people of India to a healthy, thriving river basin. Further, the Act establishes the rights of the people of India and their governments to defend and enforce the rights of the Ganga.

BY GOD'S GRACE

The Life & Teachings of Pujya Swami Chidanand Saraswati

A gorgeous coffee table biography of Pujya Swamiji has been published entitled *By God's Grace*. Upon its release, this book held the NUMBER ONE position as a best-seller in Amazon.com's Hinduism section, out of a total of over 17,000 books!

It is a nearly 300 page coffee table book filled with exquisite photos of Ganga, the Himalayas, and all of the saints and world leaders with whom Pujya Swamiji has spent the first 60 years of His life. However, it is more than just a beautiful beautiful book. It also tells the inspiring, uplifting and transformative stories of Pujya Swamiji's whole life — from meeting His Guru at the tender age of eight, to His youth filled with intense sadhana in the Himalayan forests and jungles, including standing on one leg for 11 hours a day.

By God's Grace then goes on to beautifully describe Pujya Swamiji's arrival into Rishikesh and choice to stay there, followed by the

history of His life at Parmarth Niketan, first as a young student and then as head of one of India's largest spiritual institutions. You will read about His travels around the world, touching and teaching people of all religions, all cultures and all walks of life. The book further details Pujya Swamiji's unparalleled projects and achievements including the eleven volume Encyclopedia of Hinduism, the construction of three ashrams in the sacred land of Lake Mansarovar and Mt. Kailash in Tibet, widespread tsunami relief work and now an unprecedented project to clean, preserve and protect the 2500 kilometer divine Ganga.

Lastly, even though for those blessed to know Him, we all understand that His life is His message, the book also includes special "teaching" sections in between the chronological chapters. Each special teaching spread takes one of Pujya Swamiji's most fundamental teachings and shares it, in His own words, through His own voice, on gorgeously illustrated pages.

His Holiness the Dalai Lama has written the foreword and shares His own thoughts and experiences with Pujya Swamiji.

This book is perfect for personal reading and for gracing the top of your coffee table, and it is also the perfect gift for any friend or loved one who, whether they know Pujya Swamiji personally or not, is looking for a glimpse into the life of one of history's truest, wisest, deepest, funniest and most down-to-earth spiritual leaders.

Laugh, cry, look at yourself and your life in a brand new way.
